TECNOVE

TECNOVE is a company founded and established in Herencia, Ciudad Real, that carries out its activity in different sectors. Its work and evolution are marked by quality, innovation and customer service.

Its main lines of business are:

Vehicles

Design, manufacture and maintenance of bodyworks and special vehicles

Containers

Design and manufacture of containers and shelters for all types of uses and activities

CSC | Catering · Services · Construction

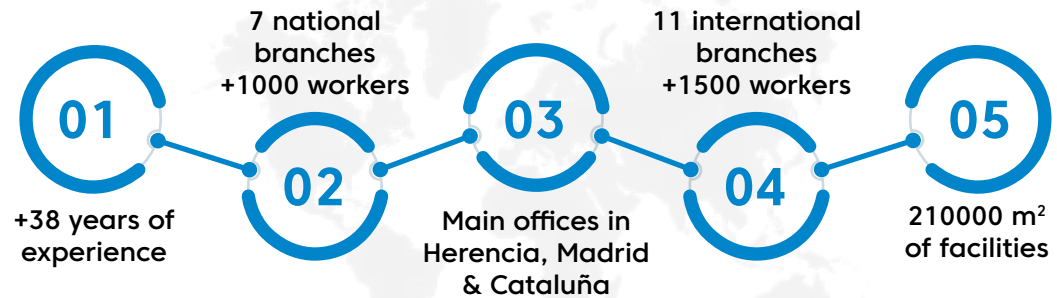

Construction of modular facilities, maintenance, cleaning, catering, etc

TECNOVE

BUSINESS GROUP

TECNOVE is part of a trade group made up of 10 companies that carry out their activities together in the **TECNOVE Business Group**.

This adds to the business lines image and furniture solutions, telecommunications, energy and remarketing.

**People,
the epicentre
of our culture
and principles**

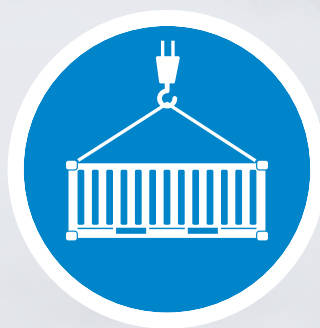

Solutions to defense & security

The Armed Forces and the State Security Forces and Corps have to carry out **highly committed missions**, in which their **mobility**, their **deployment capacity** and their own **security** are clearly linked to the means, equipment and vehicles they use in their mission:

- We manufacture **vehicles for military use**, providing a solution to any transformation need, adapting the structure, chassis or bodywork to accommodate additional elements or to improve performance.
- We build **containers and shelters** configured entirely for military use.
- We offer **integral management** for civil and military camps.

Vehicles

TECNOVE has extensive experience designing, transforming and equipping all types of vehicles for use by different **security forces**.

It has all the **quality accreditations** required in this sector, as well as working for the main defence technology companies.

Among the solutions for military vehicles, two highly demanded product solutions stand out:

- **Military vehicles**
- **Police and armoured vehicles**

Military vehicles

Thanks to the experience acquired over the years, **TECNOVE** has developed large industrial capacities for the **manufacture of military vehicles**, such as:

- Transport of Troops and Loads
- Units of Frontier Vigilance
- Air Control Towers
- Special Bodybuilding
- Assault Stairs
- Units NRBQ
- Military Logistics Vehicles

The different solutions offered can be **adapted to any type of vehicle**, both light and heavy, adapting the structure, chassis or bodywork to accommodate additional elements and improve performance.

Police and armoured vehicles

Police and armoured vehicles **can be built on chassis of any make and model**. Depending on the needs of the respective security force, **special features such as sirens, lights and specific communication systems can be included**.

The most common **police vehicles** are:

- Patrol
- Motorcycles
- All-Terrain Vehicles 4x4
- Vehicles to Transport Prisoners

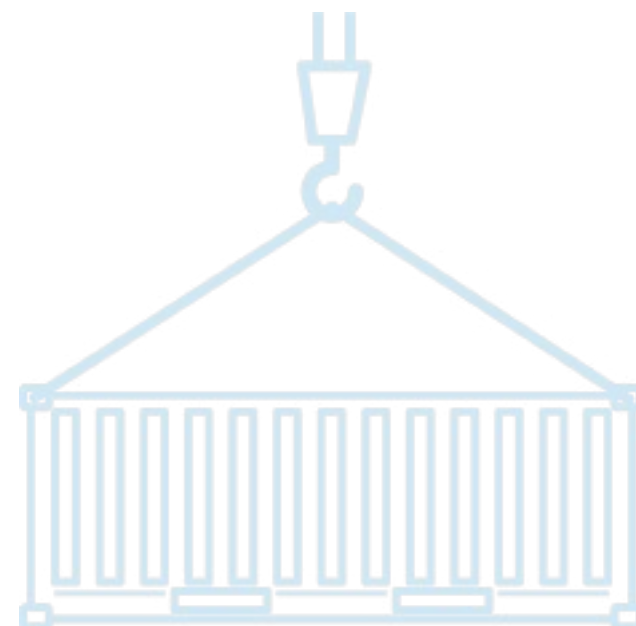

Furthermore, at the customer's request, the units can be fitted with **partial or total armouring elements**, thus improving the vehicle's performance and guaranteeing **complete functionality and safety**.

Containers

TECNOVE has a long history in the **construction, adaptation and reconditioning of containers**, configured entirely to adapt them to the services performed in military camps.

Depending on their construction and purpose, they are divided into:

- Personalized
- Standardized
- Refrigerated
- Expandable

Containers

Customizable

Its main characteristic is that **it can be adapted to the purpose for which it is intended**, both externally and internally. In defence and security, they include command and surveillance posts, accommodation, complete bathrooms and even kitchens.

Standardized

The quality of this type of container is its manufacture, which is carried out on the basis of **standardised measurements that allow it to be transported by any means**. Their main function is the transport and storage of the customer's material.

Containers

Refrigerated

They are specially designed and manufactured for **the transport and storage of goods that require specific temperature conditions**. In military camps they are used for the storage of provisions, such as food and/or medicines in long-stay missions.

Expandable

With the **ability to alter their dimensions in both width and height thanks to their collapsible structure**, the expandable containers can be put to multiple uses, such as sanitary support in field hospitals, rooms or offices in military camps.

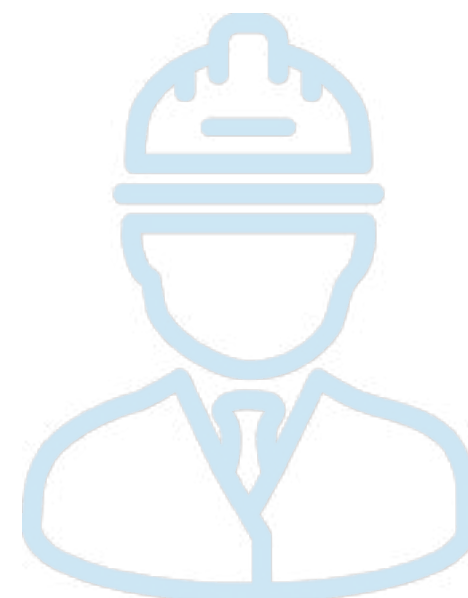

CSC

TECNOVE CSC has more than 20 years of experience in the **integral management of military camps**, having participated in large projects located in remote areas of difficult access, devastated and/or conflict areas with very limited resources and places with extreme weather conditions.

The defence and security area offers from the construction of the camp or base, to the catering, maintenance and leisure services that will keep the facilities in perfect condition.

The aim is to adapt to the client's needs and the destination of the operation by offering the following skills:

- Catering
- Services
- Construction

Catering

TECNOVE is in charge of managing the **supply, logistics and feeding of soldiers in peace missions**; specialising in reaching areas at risk due to war, political or social conflict.

It offers the possibility of **complete catering services**, including preparation and cooking in the camp's own facilities.

A **specialised team** made up of waiters, cooks and auxiliary personnel guarantees that, in the areas of operations, the members of the armies deployed on these complex missions have a **varied, top-quality diet** with the necessary energy intake.

Services

TECNOVE offers customised services for the **management of military camps**, ensuring their complete operability in a safe and effective manner.

Some of **the most requested services** for these camps are:

- Total maintenance and cleaning of the facilities
- Laundry
- Hairdressing
- GYM
- Library

TECNOVE's mission is to maintain military installations in the best conditions, and to make the users' stay a comfortable experience, **creating a home wherever it is needed.**

Construction

TECNOVE has acquired great experience designing and applying the concept of modular construction to camps for military uses, among which the following stand out:

- Quarters
- International mission bases
- Offices
- Canteen
- Temporary Housing

These camps are built in such a way as to ensure that they are **fully operational** anywhere in the world. Furthermore, the construction is carried out in such a way that their subsequent use is **efficient, optimised and adapted to their purpose.**

The construction of the camps includes all types of **installations**, such as plumbing and drainage, electricity, lighting and air conditioning, among others.

Construction · Field Hospital

TECNOVE offers the **manufacture of made-to-measure field hospitals with the medical equipment and furniture necessary** to be able to offer medical care on site.

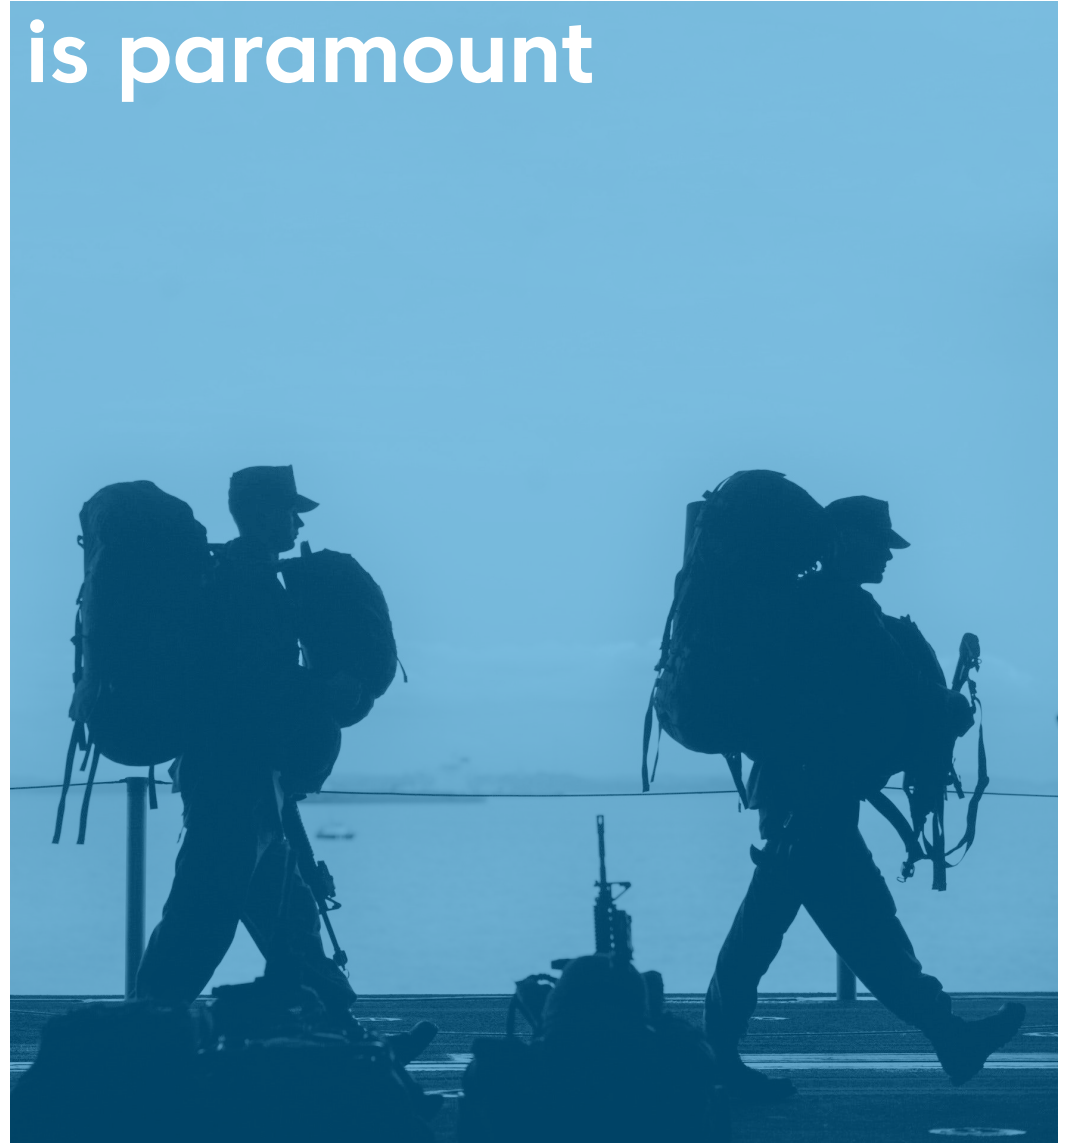

According to the needs and indications of the clients, they can be designed in the format of trucks, tents, containers or even a combination of the three proposals.

They are suitable for **quick and easy deployment in any location**, with other auxiliary elements to complement the facilities, such as laundry, drinking water treatment, storage and lighting towers, among others.

Your safety is paramount

At **TECNOVE** we continue to work with various national and international institutions and organisations, offering our products, equipment, units and services of the highest quality, reliability and resistance.
