GENERAL CATALOGUE

Vehicles • Containers • CSC | Catering, services, construction

“Working together for you”

TECNOVE Business Group is a trade group made up of 10 companies from various sectors, in which they maintain a leading position thanks to the daily work of their team of professionals.

Their professional experience of more than 38 years, together with the commitment and the values that define them, enable them to provide their customers with the best quality, innovative and customized products and services anywhere in the world.

VEHICLES

Design, manufacture and maintenance of bodywork and special vehicles

CONTAINERS

Design and manufacture of containers and shelters for all types of uses and activities

IMAGE & FURNITURE

Creation and implementation of corporate identity, furniture and digital media for companies

CSC

Catering · Services · Construction

Comprehensive services for organisations: facility construction, maintenance and catering

ENERGY

Management and maintenance of electrical installations, solar farms and photovoltaic plants

AGRIBUSINESS

Farm management, forest planning and management, plant-protection and cleaning products

TELECOM

IT implementations and developments, services applied to telecommunications

REMARKETING

Reconditioning of passenger cars for further commercialisation

“Wherever you need us”

TECNOVE is a company with more than 38 years of experience marked by quality, innovation and customer service.

Born and developed in Herencia, Ciudad Real, Spain, it has managed to position itself as one of the economic pillars of the region, maintaining its origins and location in this town as well as opening new branches nationwide. In doing so, it is committed to anchoring population and wealth to the territory and to continuing to remain part of the industrial fabric of the town.

Among its main lines of business are the **manufacture and conditioning of special vehicles and containers, catering, maintenance and construction services, and forest management and advice.**

Vehicles

***“A world
on wheels”***

At **TECNOVE**, we are specialists in the design, manufacture and conditioning of special vehicles, providing integral solutions and tackling the challenges presented by our clients.

Each project is carried out in a personalized way, working hand in hand with the customer to obtain excellent results.

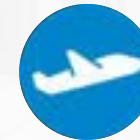

The solutions that we offer can be manufactured and adapted to any type of vehicle and chassis, taking into account the regulations of the destination country and ensuring a maintenance service adapted to each customer's needs.

Vehicles

Health & Emergencies

We offer different options adapted to the situations and places where health care is required. We are one of the main manufacturers of **ambulances** for the United Nations and the armies of various countries. We also highlight our **multi-purpose emergency vehicles** (Rapid Intervention Vehicles, fire fighting vehicles or advanced command posts) and **mobile medical units**, adapted and equipped for any required medical speciality.

We are committed to offering the highest quality in our products, thus guaranteeing effective medical assistance in any location.

Ambulances

Medical mobile units

Medical mobile units

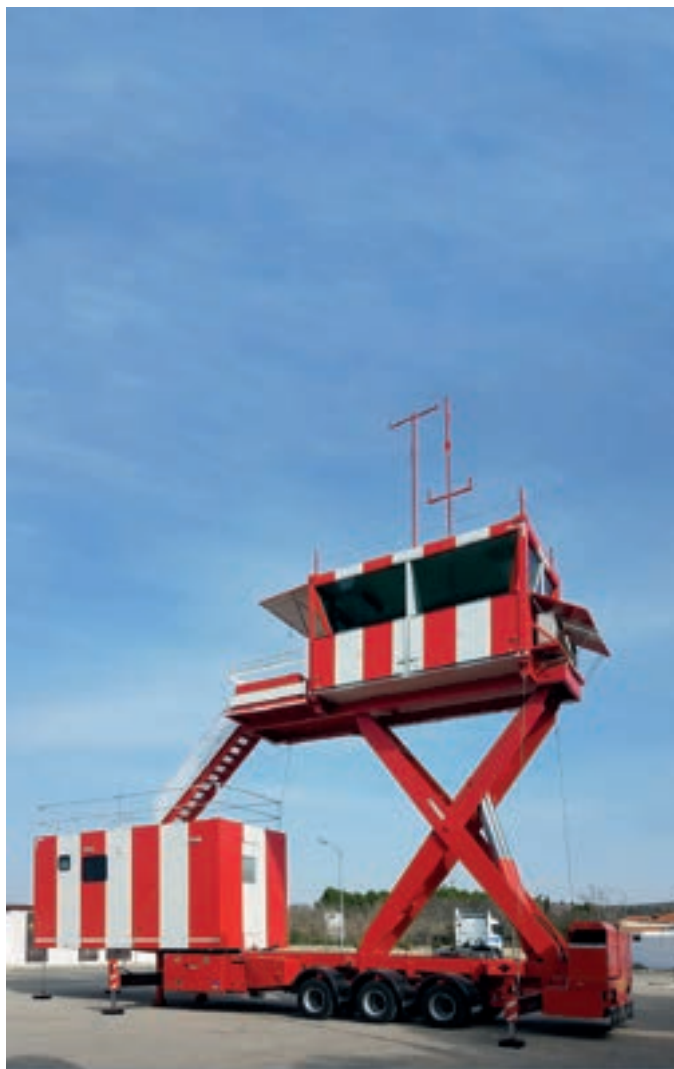

Vehicles

Defence & Security

At **TECNOVE** we offer vehicles for troop and cargo transport, border surveillance units, air control towers, special bodyworks, assault ladders, CBRN units or police and logistics vehicles, among other products.

We have all the **quality certifications** required in this sector and we work for the main defense technology companies.

Control tower

Weapons platform vehicle

Military vehicles

Vehicles

Airport vehicles

We design and build vehicles and products for the **Ground Support Equipment (GSE)** market.

Our **high loaders trucks** and **ambulifts** stand out, which integrate our own lifting system, thus optimizing the vehicle's performance.

All our solutions can be adapted to the operational requirements of any aircraft model from major manufacturers.

Catering vehicle

Maintenance vehicle

Vehicles

Railway vehicles

We work to design and manufacture state-of-the-art railway equipment.

This includes vehicles such as [railway trucks](#), [wagons](#), [backhoes](#) and even [maintenance workshops](#), [cranes](#) and [lifting platforms](#).

We adapt vehicles to [any track gauge](#) for their use in maintenance, cleaning, electrification, inspection, catenary and lighting work, rescue and derailment or construction.

Bivial machinery

Special projects

Wagons

Vehicles

Special vehicles

These are units that stand out for their **exclusivity**, either because of the design of the product, the purpose they are going to be used for, the equipment or other **characteristics that differentiate them** from the rest of the vehicles offered at **TECNOVE**.

This area includes promotional and training vehicles, mobile workshops, auxiliary units and any other type of vehicle that arises from a specific need.

Vehicles

TECNOVE Business Group

TECAI, **TECNOVE Fiberglass** and **TECNOVE Custom Trucks** are, together with **TECNOVE**, the companies of the **TECNOVE Business Group** that specialize in the area of vehicles.

The products that these companies design and manufacture can be of many different types, including [logistics and parcels vehicles](#), [isothermal and refrigerated vehicles](#), [telecommunications vehicles](#) or [competition vehicles](#) (motorhome, hospitality, catering vehicles, trailers for different uses, etc.).

Logistics and parcel services

Isothermal and refrigerated

Hospitality

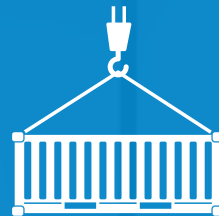

Telecommunications

We design, build, adapt and recondition containers and shelters for any type of activity and use. Among them, we stand out the ones used for communications, medical, refrigerated, mobile workshops, defence and special uses.

Our containers are manufactured and adapted for multimodal transport and so that, once they arrive at their destination, they can be easily installed to fulfil the purpose for which they have been designed.

Containers

“A space where everything has a place”

Expandable

Standardized

Modular

Personalized

Generator Enclosures

Refrigerated

Containers

Expandable

Their construction allows [the dimensions to be modified](#), both in width and height, thanks to its [folding structure](#) by means of a mixed system. They can be easily transported and, once they have arrived at their destination, they can be deployed quickly and efficiently.

Standardized

They can be manufactured [in any ISO format](#), the most popular sizes being 20 and 40 feet, which facilitates [multimodal transport](#). We can carry out any transformation and installation of equipment.

Containers

Modular

Their appeal lies in the **possibility of being designed in combination with other containers** to achieve the desired height and width, resulting in a product that is safe, easy to install and more economical than a fixed construction.

Personalized

Both the exterior and the interior of these containers are **designed and manufactured according to the customer's requirements**, thus obtaining a unique product, specifically equipped to fulfil the function for which it has been designed.

Containers

Generator Enclosures

These are **soundproof** spaces specifically designed to **house and protect from the weather large electrical generators** to supply the necessary energy to the target installations.

Refrigerated

They are intended for the **transport or storage** of goods that require **controlled temperature conditions**. The manufacture and equipment of the containers will be adapted to the customer's needs.

At **TECNOVE** we offer integral solutions for modular buildings, camps, bases of life and hospitals, from their construction to the provision of other complementary services that guarantee their operability, such as catering, management, maintenance and cleaning services.

Our objective is to offer excellent living conditions for the entire team of people deployed in each project.

CSC

*“We create a home
wherever you need it”*

Catering

Services

Construction

CSC Catering

We provide **catering services in various fields**, from hospitals and the military to large companies.

These services focus on the **development, preparation and service of menus** with specific nutritional requirements according to the preferences and needs of the customers, in addition to the **supply and logistics of food products**.

Companies and organizations

Public and private institutions

Military camps and bases of life

CSC Services

At **TECNOVE** we offer **personalized services** for the partial or total management of facilities, ensuring their complete operability in a safe and effective way.

Our work consists of **preserving and maintaining infrastructures, machinery and equipment**, as well as **providing an optimal laundry, cleaning and disinfection service**, among others, to guarantee a perfect state of conservation.

Maintenance

Cleaning

Laundry

CSC

Construction

We focus on the **development of buildings**, meeting the needs of the client and guaranteeing their quality, energy efficiency and durability.

Based on the concept of modular construction using transpack containers, **we construct buildings, facilities, bases of life** and **field hospitals**. Our aim is to ensure the well-being of users anywhere in the world, including in devastated or conflict areas.

CSC

Field Hospital & Reconstruction

TECNOVE offers you the manufacture of made-to-measure **field hospitals** with the necessary **medical equipment and furniture** to be able to offer health care on site.

They are suitable for a **quick and easy deployment in any location**, with other auxiliary elements to complement the facilities, such as laundry, drinking water treatment, storage and lighting towers, among others.

At **TECNOVE** we know that innovation is a fundamental element to increase our productivity in the market, to anticipate possible disruptors and to be more efficient. That is why we work in a constant process of evolution in order to maintain our innovative essence.

This process is marked by the improvement and development of new products based on the **research and application of new technologies, the optimization of production systems and an exhaustive analysis of our performance.** In addition, we take safety and environmental care very much into account, so we use non-polluting materials and products to design safe products for users.

Innovation

***“Committed to
the future”***

R&D

Green Hydrogen

Projects

R&D

We collaborate with different organizations, technology centres and business associations on [research projects](#), including the following:

- **Tereco:** thermodynamic system for ecological supply.
- **Hyprint:** hybrid luminescent devices for industrial applications.
- **Mosapo:** multi-purpose sanitary module.
- **8 Alturas:** containers with opening on all sides.
- **Second Life:** research into the creation of 2nd life batteries.

Tereco*Hyprint**Second Life*

Projects

Green hydrogen

We are currently working on several [research projects related to Green Hydrogen](#), including the following:

- **H2 Login:** technological model for emission-free logistics transport. Its main objective is to develop and implement the transformation of two pure electric vehicles into hydrogen-powered vehicles.
- **Biomotion:** a model of individual and universal zero-emission mobility. It aims to develop a highly environmentally friendly single-person vehicle using bio-based materials and clean energy.

TECNOVE'S TEAM

In **TECNOVE** we have always had a great team of professionals fully qualified to study in depth and carry out the design and the most appropriate solution for each client.

Thanks to these people and the experience acquired over the years, **TECNOVE** continues to this day to be a motivating project where all parties are committed to offering maximum excellence in their projects.
